Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Claims 1-60 allowable over the prior art of record because none of the prior art teach or suggest the **claimed combination as recited**, particularly require: the waves being transmitted by the wave transmitter in pulses or modulated such that a processor is able to determine the distance between a wave-transmission and reception point and the ground and the velocity of the vehicle based on analysis of the waves transmitted by the wave transmitter and the waves received by the wave receiver (independent claims 1, 48, and 55).

The closest prior art of record (ref 6,285,938, columns 2-4) discloses a ground speed sensor to detect the travel speed, transmitting waves and receiving reflected waves and processor coupling to transceiver to process; (ref 4,016566, figures 1,2) discloses radar transmitter-receiver is a pulsed type and generating signal at a frequency f , a pulse modulator, trigger generator, mixer, IF amplifier, decoder, range selecting circuit and indicator to modulate the pulses and modulate the wave signal in pulsed form, having transmitting and reflected receiving signals.

The prior art of record does not disclose the claimed combination as recited.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
